

Annual General Meeting - 28th November 2020

Proposal for consideration

Motion Proposed

That the maximum luff length limitation for the 10 Rater class be removed for all domestic and National events.

Background / motivation / justification:

This spoils a 130 year formula and places an unnecessary restriction on designers of boats for the 10R class of boat. On waters like Frensham the restricted height does not allow the best use of the available winds where the top of the sail is very important.
